

CYPHERIX®

# **CRYPTAINER 2.0™**

Easy-to-use strong encryption for PCs

# CYPHERIX® **CRYPTAINER 2.0™**

Easy-to-use strong encryption for PCs

## FEATURES

Real time file and folder protection - Cryptainer's high-security 'on the fly' disk encryption technology ensures that your data is safe at all times. Simply drag and drop to encrypt.

Fast Encryption - Cryptainer is fast! You will barely notice the difference in speed as compared to a regular copy paste function.

No Format limitations - Cryptainer encrypts every kind of file format, whether it is textual, tabular, graphical, organized in a database, audio or video.

When you start Cryptainer, the virtual drive will appear as a drive in your "My Computer" folder within Windows Explorer. You can even view it through the MS-DOS prompt.

Once the virtual drive is loaded, you can copy, move, delete and drag and drop files just as you would with any other hard disk. Once unloaded, with a single click, your data gets encrypted.

Standard Windows functions such as cut, copy, paste, new file / folder creation, etc. can be used within the encrypted drive.

Customized, easy to remember passwords - The length of your password/phrase can be an alphanumeric combination of up to 100 characters; hence you can use longer phrases that are easier to remember, as your password.

Cryptainer's symmetric encryption system allows you to encrypt an infinite amount of data, from 1 Megabyte to 2 Gigabytes of data in dedicated areas on your hard disk(s).

Cryptainer can create volume files on removable media. This allows for the flexibility to store and port data on removable media like Zip disks, tape drives, etc.

Cryptainer works with most 32 bit versions of Microsoft Windows, on file systems such as FAT, FAT12, FAT32, NTFS, NTFS with EFS, etc.

Up to four virtual drives can be accessed at any one time, chosen from a selection of as many volumes as the available disk space allows.

Encrypted Backups are a standard feature using standard backup software/hardware, ensuring safety and integrity of data.
